

## Principal's Message

Positivity creates multiple possibilities. With the support of school supervisor, Mr Lui, an encouraging approach is adopted in LYCMC which is conducive to our teachers and students. All of us are dedicated to the promotion of a vibrant environment with an optimistic outlook and collaborative attitude. We adopt this approach in our school since we believe that aspiring emotions boost learning and can lay the foundation for positive and productive interactions with students, colleagues, alumni, and parents. This new outlook is also key to achieving excellence. A variety of teaching and learning strategies are deployed in 2023 in enhancing optimism and positivity so that our students may persist in the hard work required for learning and benefit from it.

Another major concern of our school this year is STEM education which can help students develop important skills for success such as critical thinking, problem-solving, and resilience. When students learn STEM in school, they become familiar with these skills and can use them to improve themselves not just in the present but also in the future. STEM education encourages creativity, which can enhance and broaden a student's perspective, helping them take their learning beyond the classroom walls.

Lai Wai Kong  
Principal

# Impressive Performance in Competition

Students from LYCMC have been actively participating in different types of speech and writing competitions. More than 60 students got awards which reflects our students' potential in English learning. It motivates students and drives them to put forth their best effort. It sparks interest, and passion and ignites a fire within. Healthy competition requires teamwork and positive participation. Participants are encouraged to improve themselves and learn new techniques.

## Canadian Writing Competition 2023

	Name	Award
F5A	Cheung Sin Yiu	Gold
F5D	Yeung Ming Ho	Gold
F5A	Tung Janice Tsz Wing	Gold
F5A	Lau Hoi Ching	Gold
F5A	Lai Ka Kit	Gold
F5A	Sze To Chiu	Silver
F5A	Shing Sum Yi	Silver
F5A	Ho Nga Yau	Silver
F5A	Lee Hok Yin	Silver
F5A	Lam Sai Ying	Silver
F5A	Cheung Tsz Ching	Silver
F5A	Cheung Kin Yan	Silver
F5A	Chan Chun Hin	Silver
F5A	Chan Kin Hang	Silver
F5A	Mak Sum Wing	Silver
F5A	Yip Hiu Tung	Silver
F5A	Lai Yan Ting	Silver
F5A	So Hin Ki	Silver
F2D	Chuck Lok Yin	Bronze
F1D	Leung Lok Ching Magnus	Bronze
F3B	Cheng Yiu	Bronze

## Summer School for Global Leadership 2022

Our talents are invited to join Global Leadership Training with HKFYG.

## **Impressive English Learning Atmosphere**

LYCMC always focuses on creating an authentic English learning environment for our learners. Mr. Gilbert Wong, Mr. Kenneth Woodward and Mr. Stephen Edward Noakes are the NETs in our school who help organize a number of communicative activities on campus. English Café in room 106 has been renovated in July 2022 for more possibilities in English learning.

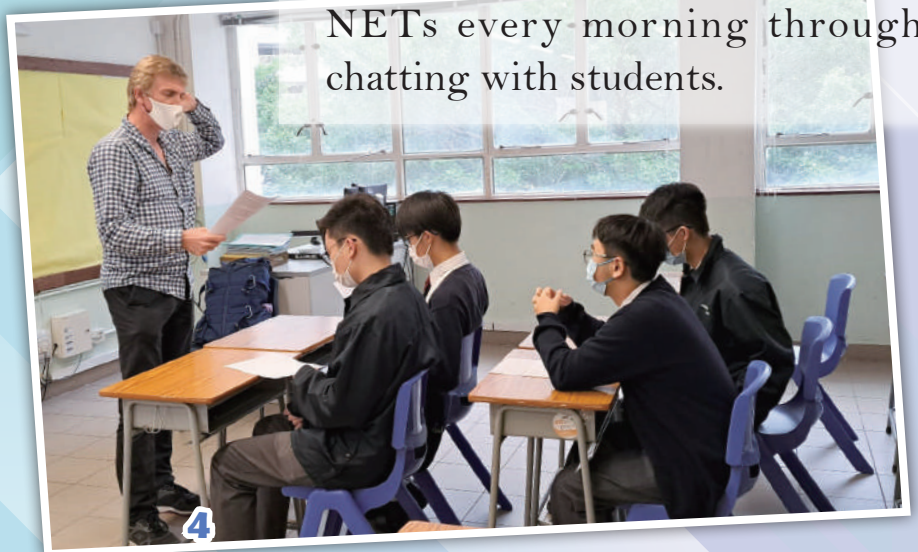

**English Café**

## Positive Values

Positive values are spread by NETs every morning through chatting with students.

## Public Speaking

We arranged a series of morning workshops in which our students are able to learn presentation and interaction skills.

# Invigorating English Activities

We designed an Annual Fun Day in November so as to build up a relaxing environment for learning English. Highlights on the fun day included Booth Games in which students were rewarded with stamps which they could redeem some snacks at the gift corner. The fun day was a great success and would not have been possible were it not for the assistance of our wonderful NETs, lovely parents, volunteers and our devoted teachers. We also enjoyed a lot of English sports events like the Rugby 7 in 2022 which greatly boosts students' interest in English.

## Rugby 7

## Learning English through Sports

In collaboration with Hong Kong Rugby Union, the captain of the Hong Kong Team, Max Woodward helped coach our students in summer. Immersive learning has been proven to be very effective in language learning. Students may listen to the comments and dialogue in Hong Kong stadium and other training venues. This relaxing atmosphere enlightens our students to explore more possibilities in English learning.

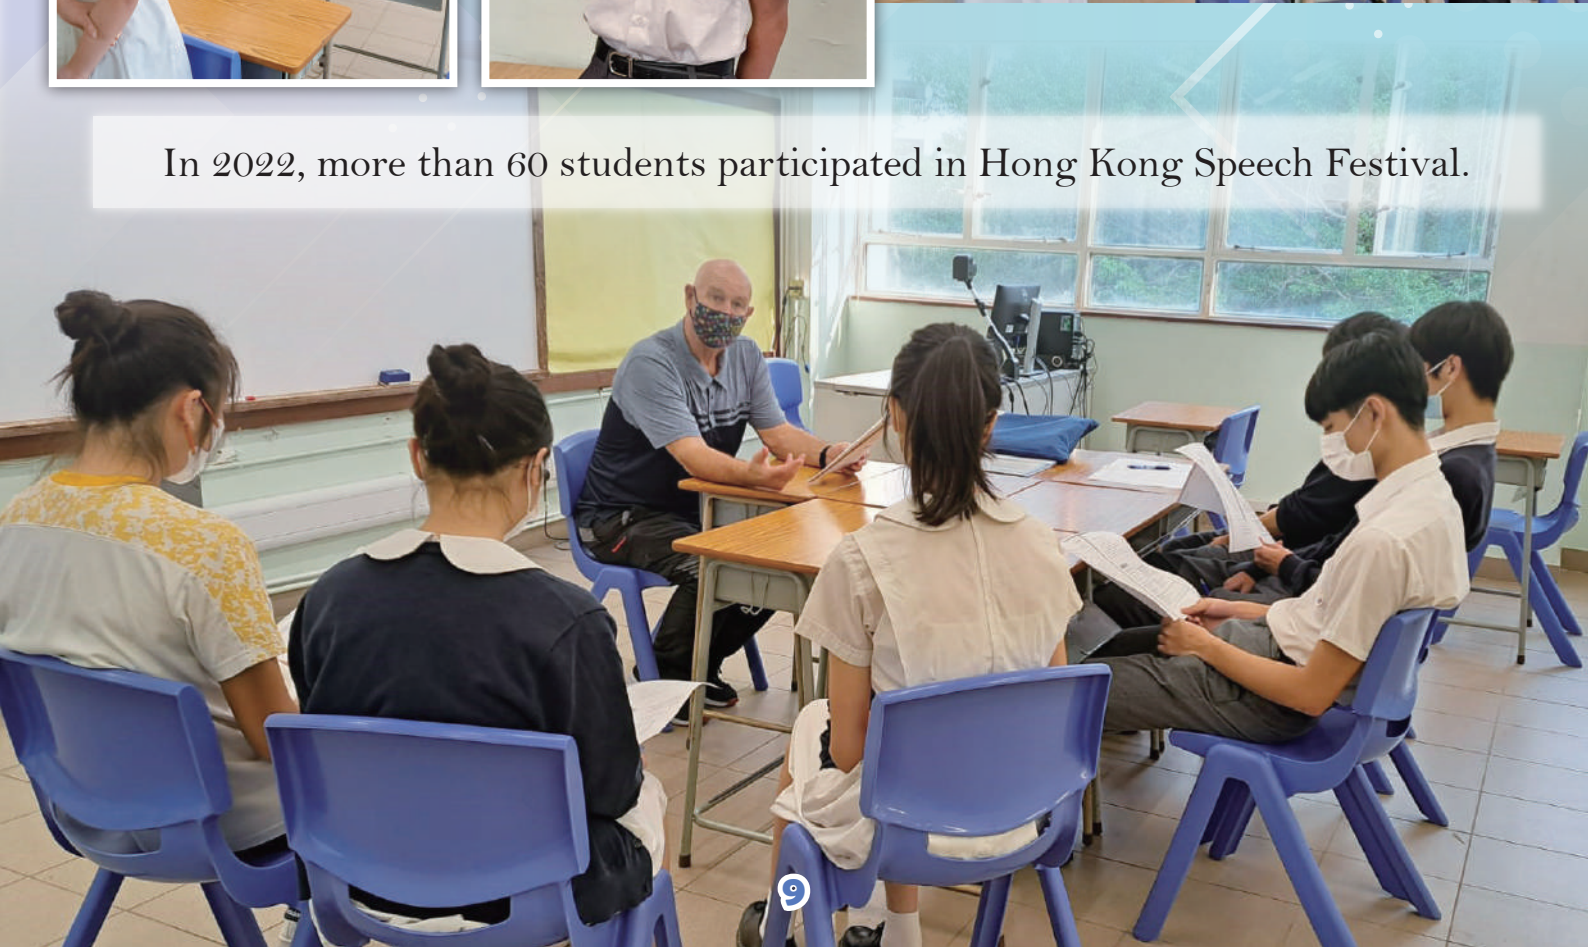

## Public Speaking Training

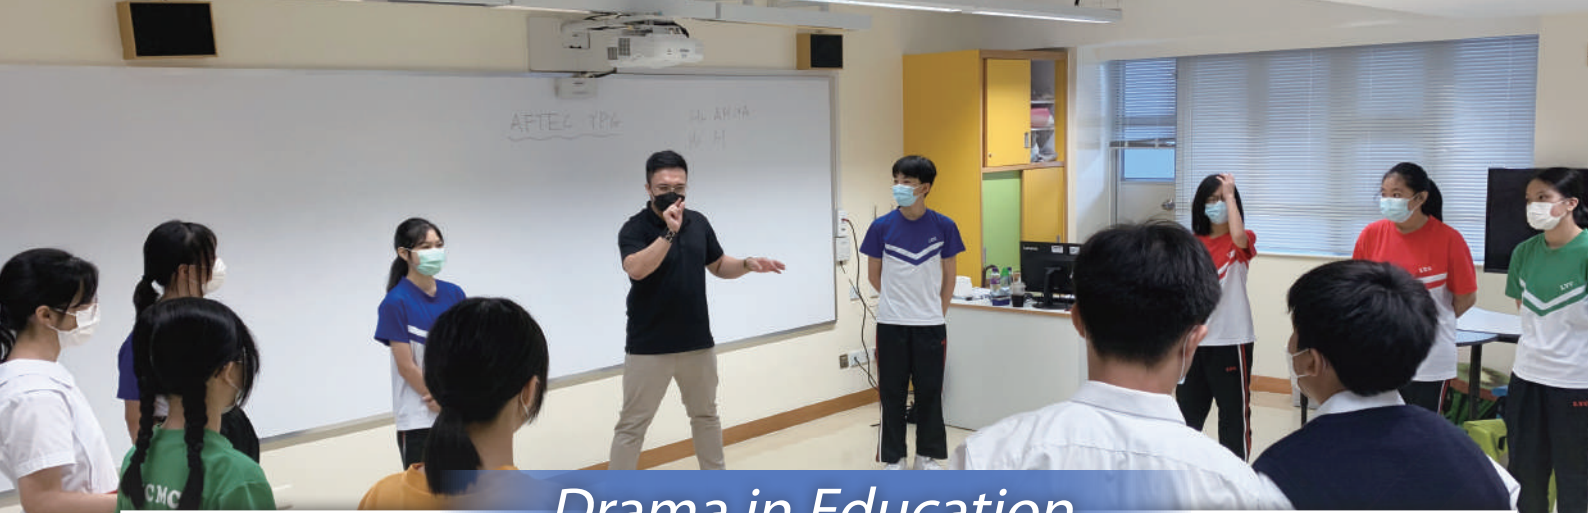

In 2022, more than 60 students participated in Hong Kong Speech Festival.

*Training with the Captain of Hong Kong Rugby Team , Mr. Max Woodward*

## *Drama in Education*

We have a strong tradition of using drama in education in language teaching. We organized training for students every week.

## *Drama in Education*

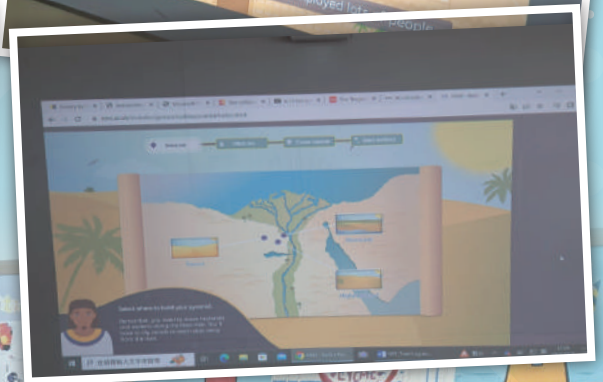

# Innovative Co-curricular English Curriculum

MOI activities and curriculum are an essential part of our English learning. In 2023, we joined the MOI development project with The University of Hong Kong on history and science. The collaboration is called The Training of Resource Persons in Implementing Language across the Curriculum in the English Medium. We produced learning packages in science and history so that students may develop more creative ideas in these areas.

## Professional MOI Development with The University of Hong Kong

## STEM Class for Elites in Math and Science

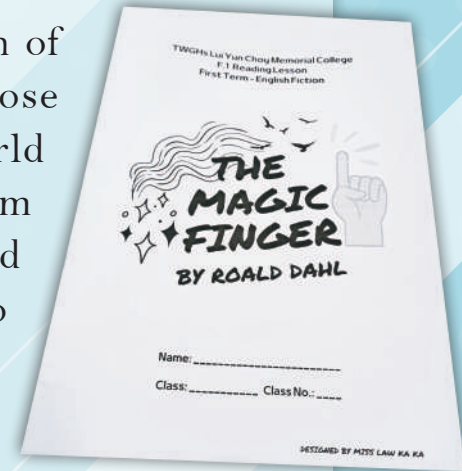

Students who have shown strong interest in Math, Science will be given additional STEM classes on robotics on Saturday. This activity is important as it nurtures talents in LYCMC to meet an increasingly demanding field. The global technology and innovation sector is growing at rapid rates, and our ever-advancing world needs equally many bright minds to power innovations.

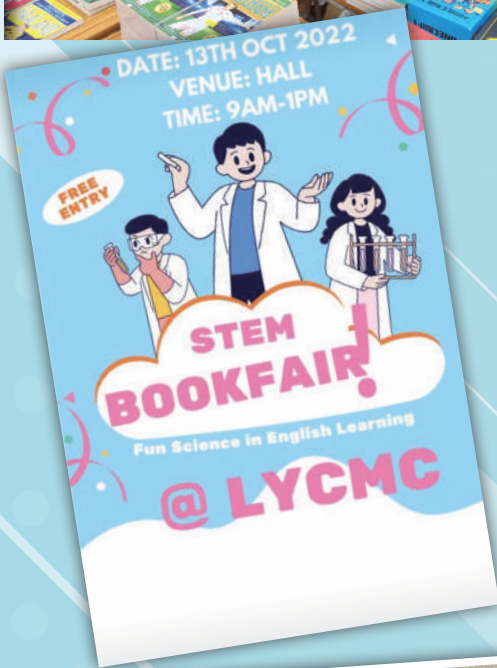

# Inspiring English Reading Scheme

There has been a long tradition in the facilitation of reading in LYCMC. Morning Reading can expose students to new ways of understanding the world and handling different situations. It can help them discover their hobbies and explore things that could eventually become their future career. Reading also helps them better understand themselves and opens their mind to accept the changes in their life.
